## Experience

**Software Engineer** May 2025 – Present
*Tata Consultancy Services, Mumbai* *Java, Spring, NextJS, GitLab, Ansible, JFrog, SonarQube, Fortify*

- Developed and maintained **Java/Spring REST APIs** for Enterprise Document Management System, supporting 30M+ daily transactions across an 8-node production environment with 99.9%+ availability.
- Built **NextJS** modules integrating 68 REST APIs with reactive forms and centralized error handling, reducing UI defect reports by 20%
- Engineered **GitLab CI/CD pipelines** for 68 APIs across 4 environments, integrating build, testing, quality gates, security scans, artifact management, and deployments; reduced deployment time from 2 hours to 10 minutes.
- Integrated **SonarQube, Fortify, and JFrog Xray** for SAST, SCA, vulnerability detection, code-quality enforcement, and secure artifact delivery within the CI/CD lifecycle.
- Automated **PR–DR failover, infrastructure health checks, and deployment operations** using **Ansible** across 28 nodes, reducing manual intervention from ∼1 hour to 3 minutes.

## Technical Skills

**Languages**: Java, Python, JavaScript, TypeScript, SQL, HTML, CSS
**Frameworks**: Spring Boot, Kafka, ReactJS, Next.js, Node.js, Express.js, Restful APIs
**DevOps**: AWS, Google Cloud, Docker, Kubernetes, Jenkins, GitLab CI/CD, GitHub Actions, Terraform, Ansible

## Projects

**FundSeed** | *Solidity, NextJS, TailwindCSS, Hardhat, Waffle, Ethers, Metamask* GitHub | Demo

- Developed an **Ethereum Blockchain**-based Decentralized Finance (DeFi) application focused on fundraising for startups, allowing users to create and donate to crowdfunding campaigns using **Ether** and **Metamask**.
- Designed and implemented smart contracts using **Solidity** to securely handle campaign creation, donations, and withdrawals along with **Ether.js**.
- Built a responsive and dynamic user interface with **Next.js**, and **TailwindCSS**.

**DropSend** | *Next.js, WebRTC, WebSockets, Cloudflare, Web Crypto API* GitHub | Demo

- Engineered direct browser-to-browser file transfers using **WebRTC**, keeping private files off the servers & storage
- Implemented **AES-GCM encryption**, **48 KB chunked transfers** and backpressure handling with **SHA-256 integrity verification** for received files.
- Built real-time signaling with **WebSockets, Cloudflare Workers, and Durable Objects**.
- Integrated **OPFS-backed receiving** with a memory fallback capped at **256 MB**

## Achievement

- **Google Cloud Professional Cloud Architect** , certified by Google for expertise in the **Google Cloud**
- **3 x Hackthon Winner** , Artificial intelligence and Data Science Hackathon, secured 1st Runner-up place among 500+ participants, developing an **Cloud-native and Machine Learning based** Diabetes Prediction Solution
- **Gold Microsoft Learn Student Ambassador** , recognized by Microsoft for contributions to the Microsoft Azure and **Open Source** Community, Taught Microsoft Azure and Git to 1200+ students across Nashik City
- **Open-Source Project Maintainer at IIT Patna & Guwahati** , earned **150+ forks** & **100+ stars**
- **Solved 500+ programming problems** based on Data Structures, and Algorithms on LeetCode

## Education

**Savitribai Phule Pune University** 8.5 / 10 CGPA
*Bachelor of Engineering, Computer Science* *May 2020 – May 2024*
